Full Stack Engineer building end-to-end web, iOS, and Android products through BiteCraft. Experienced in Next.js, React, React Native, Node.js, Redis, Firebase, Supabase, C#, and ASP.NET, with ownership across frontend, backend, infrastructure, deployment, and production launch. Uses AI-assisted workflows with Cursor, Claude, Google Gemini, LangGraph, agentic coding, and MCP while validating generated code through secure

CORE SKILLS

Frontend	Next.js, React, React Native, TypeScript, Swift, Tailwind CSS, UI/UX Implementation
Backend	Node.js, C#, ASP.NET, Redis, Firebase, Supabase, pgvector, RESTful API Design
Infrastructure	DevOps, Server Configuration, End-to-End Deployment, Production Launch
AI Development	LangGraph, LangChain, Google Gemini API, Agentic Coding, Cursor, Claude 4.5, MCP
Security	Secure AI-Assisted Coding, AI Output Validation, Basic Cryptography Principles
Ways of Working	Agile, Scrum, Sprint Planning, Team Leadership

EXPERIENCE

Founder & Independent Full Stack Developer | BiteCraft

2022 - Present | Ankara, Türkiye

- Deliver web, iOS, and Android products independently through BiteCraft, owning development from concept to deployment.
- Built B.O.T.S. - Based On True Stories, an AI-powered party game that converts real Reddit stories into structured gameplay with LangGraph, Google Gemini, Supabase, pgvector, and Kick chat integration.
- Build Zoka, a cross-platform multiplayer social deduction bluff game for iOS and Android, using React Native and Firebase.
- Apply Cursor, Claude, and agentic coding workflows to accelerate development by 50%+ while validating AI-generated code for security, maintainability, and architecture fit.
- Own full-stack implementation, technical decisions, infrastructure setup, deployment, and product iteration.

Full Stack Developer | BiteCraft - Remax Turkey

2025 - 03/2026 | Ankara, Türkiye

- Architected and developed a modern real estate filtering and management platform for a local Remax branch.
- Built the full stack independently with React, Node.js, and Redis.
- Managed system design, DevOps, server configuration, and final production launch.
- Developed flows for preference questionnaires, smart search, property filtering, listing exploration, and map-based discovery.

Scrum Master & Team Lead | GOIT Bootcamps

03/2024 - 10/2024 | Ankara, Türkiye

- Led agile development teams during an 8-month intensive full-stack program.
- Coordinated sprint goals, team collaboration, and delivery quality across 10+ comprehensive full-stack projects.
- Supported code quality, planning discipline, and effective communication across project teams.

SELECTED PROJECTS

B.O.T.S. - Based On True Stories

2026 | Next.js, TypeScript, LangGraph, Google Gemini, Supabase, pgvector

AI-powered party game that turns real Reddit stories into structured storytelling sessions with PullPush sourcing, Gemini story evaluation, breakpoint questions, final judgment voting, and Kick streaming chat integration.

Zoka

2025 - Present | React Native, Firebase

Cross-platform multiplayer social deduction bluff game for iOS and Android, focused on room setup, player flow, game mode entry, and real-time multiplayer gameplay. Web build: 3b476628.zoka-8oh.pages.dev

Remax Turkey Filtering & Management Platform

2025 - 03/2026 | React, Node.js, Redis

Real estate filtering and management platform with smart search, questionnaire flows, property listings, map-based exploration, DevOps, and production deployment.

DraftBetter - LoL Assistant

Tailwind CSS, Product Design

Desktop-style assistant interface concept for champion recommendations, draft analysis, team state, and AI-assisted pick/ban decisions.

Sümbül Bahçe Kooperatif

Web App, Dashboard, Landing Page

Cooperative management concept with public landing pages, member flows, financial summaries, production tracking, and admin dashboard views.

GOIT Bootcamps Full-Stack Projects

03/2024 - 10/2024 | Full Stack

Completed 10+ full-stack projects in agile teams while coordinating sprint planning, delivery quality, and collaboration as Scrum Master & Team Lead.

PulseSync

Mobile UI, Activity Tracking

Mobile fitness and heart-rate tracking interface concept with workout summaries, live activity metrics, heart-rate views, and compact navigation.

EDUCATION

Ufuk University

Associate Degree in Computer Programming | 02/2022 - 03/2024

Ankara Yıldırım Beyazıt University

Associate Degree in Computer Programming | 09/2021 - 02/2022
